

Annual Corneal Health & Contact Lens Design/Power Analysis Agreement

At Scottsdale Eyeology, we carry the latest in contact lens technology and specialize in the difficult to fit patients. This includes astigmatism-correcting lenses (Toric), multifocal lenses, corneal diseases (like keratoconus) and post-surgical contact lens fits. We are dedicated to your health and an enjoyable, comfortable contact lens experience.

A **New Annual Corneal Health & Contact Lens Design/Power Analysis Evaluation** is necessary if you have no previous history of contact lens wear. This charge will be in addition to the comprehensive eye examination fee. This fee will cover the initial evaluation and all contact lens related follow-up visits for a period of 90 days. If necessary, it will also include the cost of any additional contact lens training classes needed for those individuals needing contact lens instructions for insertion, removal and lens care.

An **Established Annual Corneal Health & Contact Lens Design/Power Analysis Evaluation** is necessary to renew the current contact lens prescription and is in addition to the comprehensive eye exam fee. This evaluation will include precise measurements that are taken throughout the exam (prescription, eye curvature, and pupil size), analysis of your vision needs, and recommendations specifically tailored to you. Particular attention is paid to the corneal health, tear production, blink rate, blood vessel health and growth, etc. In some cases, the contact lens material itself, overtime, can result in new blood vessel growth and/or allergic reactions that can negatively impact your ability to wear contact lenses. Additionally, an evaluation of the lens includes corneal coverage, movement and centration, vision, and comfort. Contact lens wear is significantly more involved than many patients realize. Lastly, since a contact lens is a medical device and needs to be renewed on a yearly basis, the fitting covers the actual contact lens prescription. It may also include the use of diagnostic lenses, if necessary, by our doctors to ensure the proper fit of the lenses and good ocular health.

Note: The Annual Corneal Health & Contact Lens Design/Power Analysis Evaluation fee will range in price depending on the complexity of the contact lens worn. Follow-up visits may not be included in some Medical Fits.

The following products and services are included in the contact lens fitting and evaluation fee:

- Professional examination of contact lens fit and power
- Contact Lens related follow-up care for up to 90 days
- Trial pair of contact lenses (if available)
- Professional insertion and removal training (if necessary)
- Manufacturer rebates to purchase contact lenses through Scottsdale Eyeology

The contact evaluation fee is for professional services and does not include the cost of the lenses. The supply of contact lenses is billed separately.

Contact lenses will not be ordered or dispensed without 100% of fees paid. If we are billing to your insurance for your contact lenses, we will not dispense contacts until we have payment from insurance. Contact lens prescriptions will only be released after the initial fitting period is successfully completed (which must include the examination, fitting, and follow-up visits), and **after all fees are paid.**

Routine contact lens related follow-up care within sixty (60) days of the initial exam is included. After sixty (60+) days, an office visit fee will be charged for follow-up care (based on complexity of the evaluation). Any visit after six (6+) months will be charged as an initial full exam and evaluation.

I understand that there is an increased risk of infection or corneal ulcers that can lead to loss of vision with contact lens wear. This risk increases if contact lenses are **sleep in**. Complying with wear times, care regimens, and disposal schedules minimizes this risk. If sudden or prolonged red eyes, pain, or irritation occur, remove the contact lenses and **call** our office immediately.

Refund policy: Most patients are able to wear contact lenses successfully, but a successful fit and wear experience cannot be guaranteed. If we determine that you are unable to be successfully fitted during the initial fitting period, you will be entitled to a refund on the cost of lenses, provided that the lenses are returned in

wearable condition and are covered under the manufacturer's warranty/return policy. Contact Lenses purchased with Scottsdale Eyeology can be exchanged within 12 months. Boxes must in **returnable** condition, *i.e no marks, no torn or missing labels and must be factory sealed.*

Please note that fees for professional's services, such as examination fees and contact lens fitting fees, will not be refunded.

Contact lens prescriptions are valid for **ONE year** in the state of Arizona. Scottsdale Eyeology recommends yearly Contact Lens Evaluations and comprehensive eye examinations. These yearly eye health exams check the overall health of your eyes as well as ensuring your prescription is still accurate.

I acknowledge that I will receive an updated contact lens prescription at the conclusion of my visit today and will have access to the Patient Portal to access the prescription as well. I authorize the doctor to release my finalized prescription by email and/or through the patient portal (PHR) if finalized later.

Sign up for your patient portal (PHR) at <https://www.revolutionphr.com/portal/welcome.htm> to access your medical records and your glasses and/or contact lens prescriptions. Ask one of our team members to help you set up your login credentials.

I acknowledge that this agreement has been explained to me and that I have had an opportunity to ask questions about this agreement and services provided.
